Integration Monitor Systems

Regional Data Overview

Migration data in Europe

A wide range of migration data is collected and disseminated in Europe at national and, sometimes, sub-national level. Institutional and legal frameworks have been developed by the European Union (EU) with the aim of ensuring that migration data are of high quality, comparable across countries as a result of harmonization (as established in the legal basis), and easily accessible. A continuous process of political dialogue is in place to ensure that the frameworks keep pace with increased demands for information and knowledge.
